

Good Morning everyone,

I am working on final orders for the spray program I built for 2019. The cost is \$60 per plant (or 1000 square ft.)

I have 20 plants worth ordered so far, would love to get it up to 25-30 to help cover all the costs associated with ordering the chemicals.

<b>Product</b>	<b>Manages</b>
Zampro	Downy Mildew/Phytophthora
Chlorothalonil 720 SFT	Multiple
Ridomil Gold	Phytophthora
Quintec	Powdery Mildew
Vivando	Powdery Mildew
Fontellis	Powdery Mildew
Delaro	Powdery Mildew
TKO Phosphite	Multiple
Merit	Insects
Bifenthrin	Insects
Actara	Insects

Attached here are the chemicals. There are several new fungicides and a new insecticide. The new insecticide should really help manage aphid issues.

Let me know if you have any questions or if you would like to order a kit or two to try.

Have a wonderful day everyone!
